# NONSO EGWUAGHA

*Web Developer*

**Address**: Kamoru Ogunlana Street, Harmony Gardens Awoyaya Ibeju lekki, Lagos State.

**Email:** egwuaghafelix@gmail.com

**Phone:** 09097816911,  08141617083

**Github:** http://github.com/nonso2020

## **About**Me

Nonso Egwuagha was born on 31$^{th}$ of July 1998 to a family of four . Ever since I was a child I have always found joy in creating and building things. Coupled with my desire for creating is my love for technology, I was and still am fascinated by it. Discovering a platform where both cravings can be adequately satisfied was like a hidden treasure I discovered and ever since, I never backed down. I started coding not too long ago about 4months after my university days and immediately it felt like home. I have been able to learn  HTML, CSS, BOOTSTRAP, JAVASCRIPT.I have been able to use this knowledge to develop fast and responsive websites. I am hungry for growth and knowledge.

# Experience

### WeatherApp (openweathermapapi.org)

https://nonso2020.github.io/WeatherApp/

An Web app using the open weather map API for checking of  real time weather all over the world. This app requires you to input the name of the city you wish to check its weather. Written using HTML, CSS and JAVASCRIPT.

### Alpha (A simple portfolio)

https://nonso2020.github.io/Alpha/

A simple portfolio page built during my early days showing my skills and passions. This was written using HTML, CSS and also with the BOOTSTRAP framework .

### Todo list

https://nonso2020.github.io/TodoList/

This is a web app that can be used as a todo list for your shopping list and whatever you want to do. It possesses a delete feature and a done feature that cross the item when tapped. Written using HTML, CSS and JAVASCRIPT.
